MOBILE ASSESSMENTS

Smartphone compatible assessments that are reliable, valid and easy-to-implement

In a **nutshell**

The majority of South African test candidates do not have access to laptops but do have access to mobile devices. **tts-assess mobile assessments** deliver scientifically-credible, well-researched assessment solutions to smartphones and mobile devices.

Ease-of-use and expanded access to talent pools are key differentiators.

Key **benefits**

- Wide variety of assessments: Cognitive ability, Personality, Skills, and more
- chatAssess mobile SJTs predict actual work behaviours
- vidAssess mobile video interviewing offers a cost-effective and valid alternative to traditional interviewing
- All the benefits of best-of-class TTS integrated reporting
- Secure and legislation-compliant data storage

Ideal **users**

Assessment and recruitment specialists who want an easy, valid and convenient way of delivering assessments to all potential candidates.
